

FULLER BROOK PARK COORDINATING COMMITTEE

Membership shall include designees from relevant Town boards including the Natural Resources Commission (2 members and the Director), Board of Selectmen, Public Works, Historical Commission, Trails Committee, School Committee, and Community Preservation Committee and abutter(s). Members shall provide input on behalf of their board/committee, and contribute technical expertise and guidance in the development and implementation of the Project.

CHARGE

To assist the Town and the Natural Resources Commission with the preservation, restoration and rehabilitation of Fuller Brook Park, an important historic, open space, environmental and recreational open space, resource, essential part of the stormwater and drainage system, and vital piece of the Town's trail system;

To evaluate the needs of the Park as identified in the Fuller Brook Master Plan (2009);

To establish goals and priorities for the Park's preservation, restoration and rehabilitation;

To assess alternative plans, applying criteria for selection including but not limited to cost-effectiveness, historic preservation requirements, maintenance considerations;

To assist in outlining a process that ensures broad public participation in and support for the Project;

To define the scope and phasing of work to be undertaken by the Town; including identification of potential impacts on the Town's infrastructure (e.g., sewer, stormwater drainage, trail system, active and passive recreational use);

To prepare multi-year budget for the implementation of identified work;

To work with the Natural Resources Commission, Community Preservation Committee and other funding sources to obtain funds to rehabilitate/ restore/preserve the park;

To assist in the selection of consultants and staff to oversee the work recommended through the design phase of the Project.
