Water Conservation Tips

SEPTEMBER

When washing dishes by hand, don't let the water run while rinsing. Fill one sink with wash water and the other with rinse water.

Run your clothes washer and dishwasher only when they are full. You can save up to 1,000 gallons a month.

Use the garbage disposal sparingly. Compost vegetable food waste instead and save gallons every time.

Use a rain gauge. These are distributed by the Town of Wellesley for free.

Use a water-efficient showerhead. They're inexpensive, easy to install, and can save you up to 750 gallons a month.
