# Water Conservation Tips

## AUGUST

Make suggestions to your employer about ways to save water and money at work.

Winterize outdoor spigots when temperatures dip below freezing to prevent pipes from leaking or bursting.

When the kids want to cool off, use the sprinkler in an area where your lawn needs it the most.

Avoid recreational water toys that require a constant flow of water.

Let your lawn go dormant during the summer. Dormant grass only needs to be watered every three weeks or less if it rains.
